Note Created On: 2/2/2021 4:11:33 PM

Subjective:

Patient works for Los Angeles County as a Sheriff's Deputy. He's been doing this for 30 years. During the time of his employment, he's had cumulative trauma due to usual and customary job duties. Body parts injured are left shoulder, teeth grinding, Tinnitus, Hearing loss, back, knees, feet, and right hand.

He experiences clenching and grinding of his teeth and says that it's been going on for a while. He's had it for years. His Dentist name is Dr. Fealy and a few years ago his dentist noticed that he's grinding his teeth. He was recommended to get a mouth guard and he did. Patient also notices that he's also clenching when he is awake. He hasn't worn his night guard for a while. He has teeth sensitivity and some bone loss and recession. He experiences pain around the muscles of mastication and his TMJ area.

Objective:

Patient can open to 45 mm.

He has good range of motion.

He has moderate severe pain on palpation of the left TMJ

He has moderate pain on the palpation of the right TMJ

He has moderate pain on palpation of masseter and pterygoid muscles bilaterally.

He has recession on teeth #3, 4, 5, 12, 13 & 14.

He has mild clicking and popping of the TMJ bilaterally

He has signs of wear on his teeth

Assessment:

Gum recession

Myalgia

Myofascial pain

Bruxism

TMJ dysfunction

Causation:

In my professional opinion and with a high degree of probability I think that the patient's Cumulative trauma has affected the patient's oral facial region. Persons with stress and orthopedic pain tend to clench and grind their teeth when they're asleep and at times when they're awake. The clenching and grinding of the teeth effect the teeth by wearing them down, causing tooth loss. Clinching and grinding of teeth also leads to gum recessions, as exhibited by this patient on his teeth #3, 4, 5, 12, 13, 14. People who clench and grind will have muscle pain and TMJ pain. This is due to the stress on the mastication muscles.

Plan:

Mandibular Repositioning Device (orthotic device to be worn at night)

Four quadrants of deep cleaning.

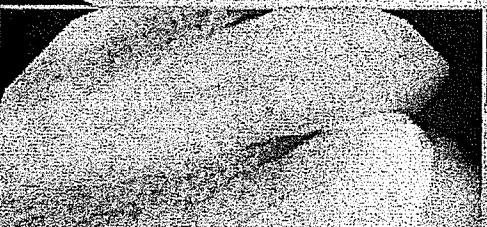

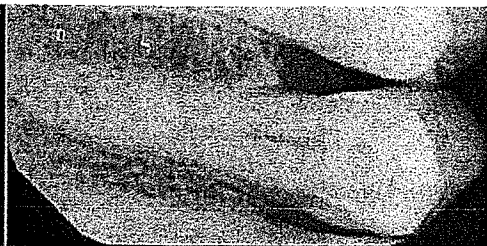

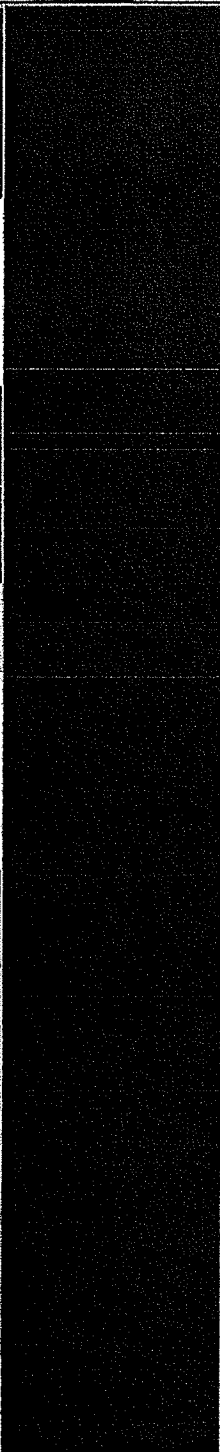

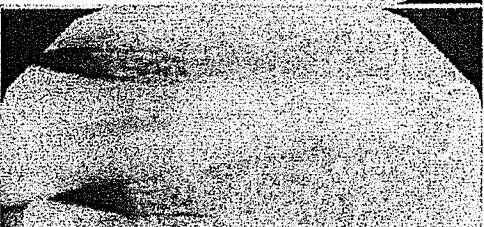

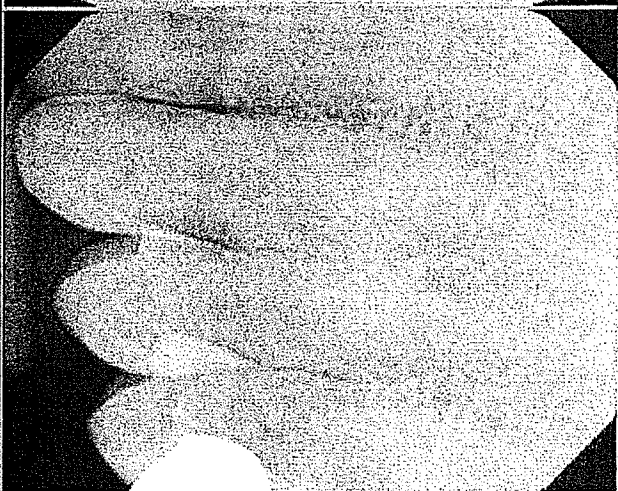

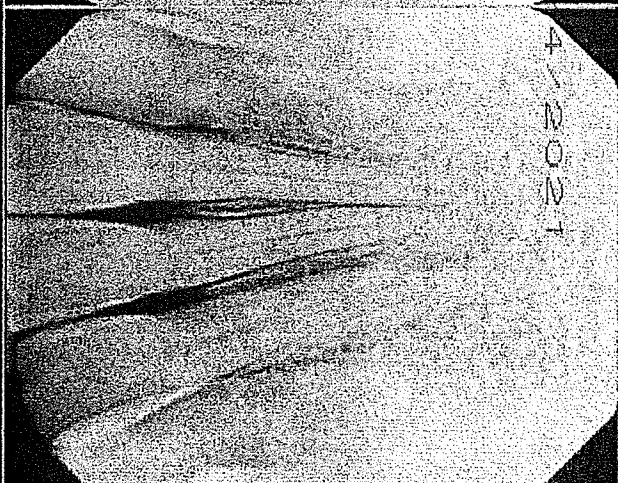

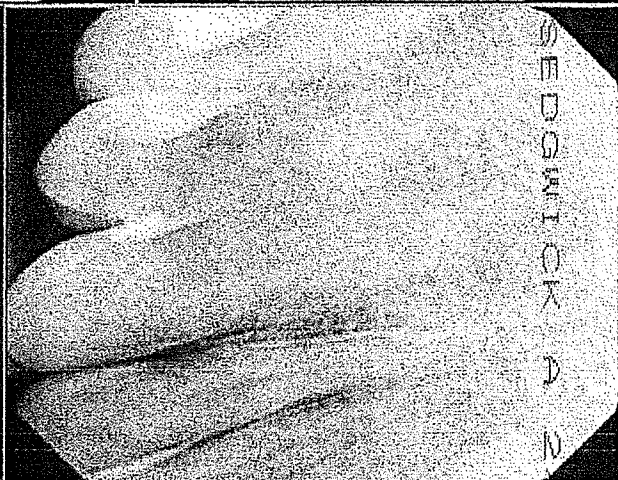

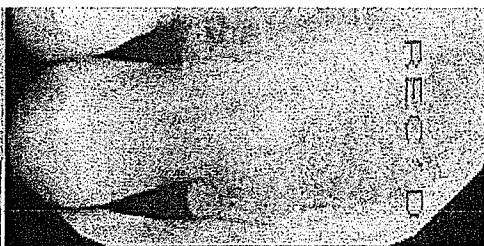

Mucogingival grafts on teeth 3, 4, 5, 12, 13, 14
